Skin Care With a Brain

4Life
TOGETHER, BUILDING PEOPLE®

Put On a Fresh Face

Your face... it's your first chance to make a fantastic impression. And with a face that's smooth, healthy, and fresh, you're ready to take on the world.

The first task in good facial care is to protect and defend. As your immune system's primary barrier to what lurks outside, providing immune system support for your skin is not merely a good idea—it's a must. 4Life's exclusive Transfer Factor E-XF™ provides the concentrated power of transfer factors to educate, train, and support your skin's healthy immune response for phenomenal protection.

4Life enummi Face products feature carefully chosen, time-tested ingredients—including Transfer Factor E-XF— to protect, nourish, and revitalize your face. So go ahead... put on a fresh face.

Key Points

- **Transfer Factor E-XF:** One of the strongest forces in nature, transfer factors have taken their place in the forefront of nutritional science. Transfer factors are tiny molecules that transfer immunity information from one entity to another, such as between a mother and her breastfeeding infant.
- **Gentle Facial Cleanser:** Start every day with a clean slate with Gentle Facial Cleanser. Featuring herbal extracts, aloe vera, vitamins, antioxidants, and the soothing Arnica Montana flower extract, this creamy cleanser washes away impurities and readies your skin for toning.
- **Refreshing Toner:** Fortified with wrinkle-repellants like royal jelly and peony flower extracts, as well as the immune system support of Transfer Factor E-XF, Refreshing Toner leaves your skin feeling refined, refreshed, and revitalized.
- **Protective Day Moisturizer:** Get totally touchable skin with Protective Day Moisturizer. This formula combines Transfer Factor E-XF and SPF 15 UVA and UVB protection and white tea, a powerful antioxidant that helps reverse the signs of aging and protect your skin from the elements, leaving your skin free to renew, repair, and replenish.
- **Night Recovery Cream:** Night Recovery Cream helps your face unwind from daily wear and tear. Enriched with Transfer Factor E-XF, moisture-hugging humectants, and Vitamins B and E, this overnight treatment balances, conditions, and restores—giving your face a much-needed rest from the stress of the day.

Did you know?

- The skin protects, absorbs, and eliminates. It provides a first line of defense for the body and functions as one of the body's largest eliminative organs. When skin functions properly it provides daily protection from harsh environmental exposure and helps eliminate toxins from the body.
- The skin often mirrors the health of the whole body. In addition to caring for your skin on the outside, good health through proper nutrition and supplementation will be reflected in the appearance of your skin.

Technical Points

- The extraction process for transfer factors from chicken egg yolks is protected by U.S. patent 6,468,534; exclusive manufacturing techniques for extracting transfer factors from cow colostrum and chicken egg yolks are protected by U.S. patent 6,866,868.
- The two most abundant and safest sources of transfer factors are cow colostrum and egg yolks. Transfer factor molecules can be shared safely and effectively. Whether they are transferred from cow to human or from chicken to human, transfer factors are not species-specific.
